

Waiver for Use of Heavy Ink Coverage on Printed Liners

Please Note: Morris Press Cookbooks does not recommend printing solid or dense coverage on our custom printed liners. Transfer of ink and ghosting can occur when heavy or dense amounts of ink are printed in one area. This can result in unwanted images and the transfer of ink on adjacent pages.

Morris Press Cookbooks assumes no responsibility for the transfer of ink or ghosting caused by heavy ink coverage or abrupt changes in ink densities called for in the design and layout of a print job.

I understand that the heavy coverage of ink may transfer ink to the adjacent pages and will not hold Morris Press Cookbooks responsible.
